PUBERTY SCANNER · PARENT GUIDE

Acne & Face Care for Tweens and Teens

Which cleansers, serums, spot treatments and pimple patches were graded Puberty Safe, what the flagged ingredients are, and how to read any label before you buy. Updated October 2026.

649
cleansers, serums, treatments, moisturizers and patches graded

55
skincare brands covered, from DTC to drugstore to teen-marketed

4,327
personal care products in the full audit, across 107 brands

Prepared by Nina-Marie Rueda, ND, NTP, CHC
Ingredient data current as of October 16, 2026

How to use this guide

Face care is often the second category a tween or teen starts buying on their own, right after deodorant. This guide shows how each product was graded against the Puberty Scanner ingredient reference, so you can compare the pimple patch, serum, cleanser, or spot treatment your child is reaching for.

1 Find the product

Look up what your child uses, or is about to buy, in Sections 5–10.

2 Check its tier

Puberty Safe means no ingredients were flagged. Every other tier lists the flagged ingredients.

3 Check the form

A cleanser, a serum, and a pimple patch carry very different risks even inside one brand. The Form column tells you which you are looking at.

4 Try a swap

If your child uses an Avoid-tier product, Section 10 pairs each product form with Puberty Safe alternatives.

What the grades mean

Face care products in this guide, by tier (649 total):

Puberty Safe (74) · Use Caution (60) · Avoid (Mild) (39) · Avoid (Moderate) (54) · Avoid (High Priority Swap) (400) · Not gradable (22)

Tier	What it means in this audit	Products
Puberty Safe	No ingredients flagged in the audit reference.	74
Use Caution	One flagged ingredient with no escalation. Worth reading the label and deciding whether it suits your child.	60
Avoid (Mild)	Flagged ingredients without an escalation.	39
Avoid (Moderate)	A flagged fragrance or metal-based ingredient is present.	54
Avoid (High Priority Swap)	Several flagged ingredients, or an escalation: PFAS, heavy metals, carcinogenicity in a leave-on product, or endocrine disruption (a known hormone disruptor is present, or three or more hormone-flagged ingredients).	400
Not gradable	The audit did not have enough ingredient information to assign a tier. This is not a safety rating in either direction.	22

Escalation terms

PFAS: per- and polyfluoroalkyl substances, a group of ingredients associated with persistence in the body and environment.

Heavy metals: metal-based ingredients the audit flags as associated with metal exposure.

Carcinogen in leave-on: an ingredient the audit flags as associated with cancer risk, in a product meant to stay on the skin.

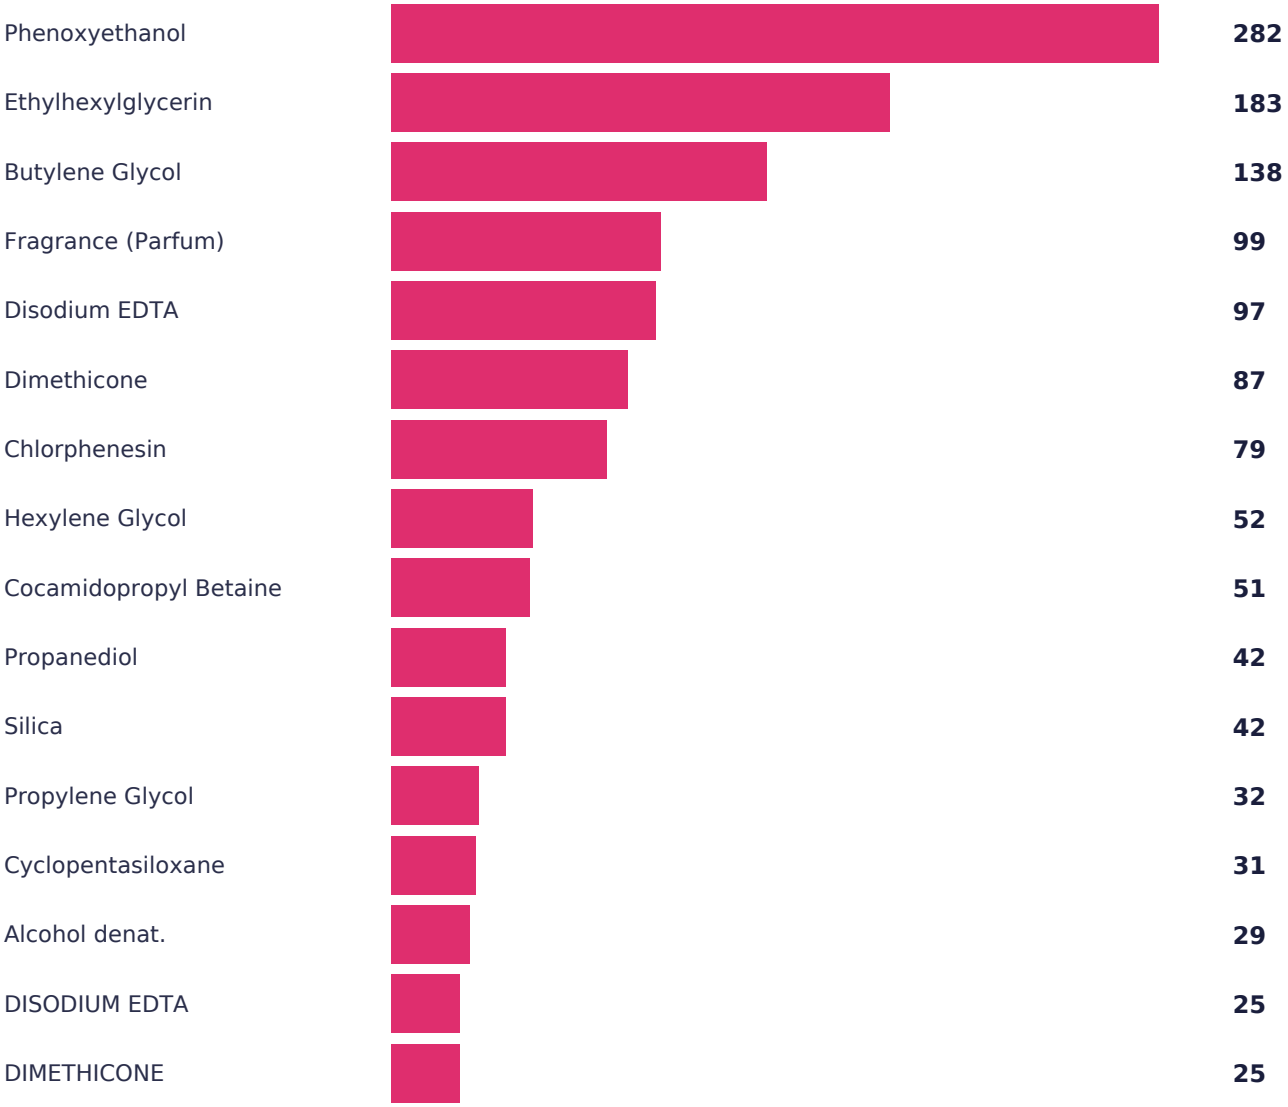

Endocrine disruption: a known endocrine-disrupting ingredient is present (parabens, phthalates, oxybenzone, octinoxate, octocrylene, resorcinol, BHA, triclosan, or aluminum salts), OR three or more different ingredients in the formula each carry a hormone-disruption flag.

Flags describe ingredients, not the company that makes the product. A flag is a reason to read the label more closely, not a diagnosis or a proof of harm.

SECTION 3

The ingredients that show up most often

Counts across the 649 face care products. Use this to spot patterns on a label. Counts apply to this audit only.

Escalation counts

SECTION 4

Patterns worth knowing

What the data shows about the face products tweens and teens are actually using.

Pimple patches are the safest category — but not uniformly

Hydrocolloid pimple patches are mostly inert dressings. Of the 47 patches in this audit, 24 graded Puberty Safe. The ones that didn't are medicated patches (salicylic acid or BPO) or patches that added fragrance, dyes, or hydrating "treatment" serums to the sticker. If your child uses patches, the plain hydrocolloid version is usually the cleanest skincare in their routine.

Adapalene and retinoids — Rx-strength on a 13-year-old

Differin's adapalene 0.1% went OTC in 2016, which means a tween can buy a prescription-strength retinoid at Target. The audit captured 8 products containing adapalene or retinoid actives, plus 24 cosmetic retinol products. Retinoids thin the stratum corneum and are category 1 (developmental toxicity) in the puberty reference. They are not casual skincare. A tween using Differin nightly plus a BHA toner plus a chemical sunscreen is stacking three leave-on carcinogen-flagged ingredients on new skin.

Cleansers look mild but carry a long preservative tail

Of the 147 face cleansers in the audit, 55 landed in Avoid (High Priority Swap). The repeat offenders are phenoxyethanol + ethylhexylglycerin + chlorphenesin — a preservative stack that shows up in 261 / 173 / 74 of all audited face products respectively. Fragrance adds another layer. A rinse-off cleanser has less skin-contact time than a serum, but kids are using these morning and night.

The "skincare routine" escalation

A 12-year-old doing one cleanser is a different exposure profile from a 12-year-old doing cleanser → toner → serum → spot treatment → moisturizer → SPF. Of the 68 serums in the audit, 56 landed in Avoid (High Priority Swap). Each leave-on step compounds the fragrance, preservative, and silicone load. Fewer steps, cleaner steps.

SECTION 5

Puberty Safe face care

Puberty Safe 74 products

No ingredients were flagged in the audit. Read the label each time you buy, since formulas change.

SECTION 10

Switch guide: if your child uses...

Common Avoid-tier products matched with Puberty Safe alternatives in the same product form. Based on the current audit — formulas change, so always re-check the label.

If they use a pimple patch from: Mighty Patch (Hero), Starface, ZitSticka, Peace Out
Puberty Safe alternatives:
- **Hero Cosmetics** — Mighty Patch Body
- **Hero Cosmetics** — Mighty Patch Chin
- **Hero Cosmetics** — Mighty Patch Day/Night
- **Hero Cosmetics** — Mighty Patch Face
- **Hero Cosmetics** — Mighty Patch Forehead
- **Hero Cosmetics** — Mighty Patch Frost Pop

If they use a spot treatment from: Clean & Clear Persa-Gel, Mario Badescu Drying Lotion, Neutrogena On-the-Spot
Puberty Safe alternatives:
- **Pure Haven** — Blemish Stick with Probiotics

If they use a cleanser from: CeraVe, Cetaphil, Clean & Clear, Neutrogena, Bubble Skincare
Puberty Safe alternatives:
- **ATTITUDE** — Revitalizing Cleansing Gel
- **CeraVe** — Acne Clay To Foam Cleanser
- **CeraVe** — Balancing Air Foam Facial Cleanser
- **Evereden** — Kids Multi-Vitamin Face Wash (Fragrance Free)
- **Garnier** — SkinActive Water Rose Micellar Cleansing Water
- **Noxzema** — Original Deep Cleansing Cream Wash

If they use a serum from: The Ordinary, Paula's Choice, Glow Recipe, Bubble, Topicals
Puberty Safe alternatives:
- **Evereden** — Super Rich Face Serum Balm
- **Paula's Choice** — Hyaluronic Acid and Peptide Lip Booster
- **Paula's Choice** — Moisture Renewal Oil Booster
- **Purely Parsons** — Face Serum: Hydrate + Protect
- **The Honest Company** — Honestly Pure Retinyl Serum
- **The Ordinary** — Volufiline 92% + Pal-Isoleucine 1% Plumping Serum

If they use a moisturizer from: CeraVe, Cetaphil, Neutrogena Hydro Boost, Olay
Puberty Safe alternatives:
• **ATTITUDE** — Peptide Face Cream
• **ATTITUDE** — Pro-age Face Cream
• **ATTITUDE** — Vitamin C Face Cream
• **Mamaearth** — Baby Face Cream
• **Mustela** — Hydra Bebe Facial Cream
• **Mustela** — Soothing Moisturizing Face Cream

If they use a exfoliant from: Paula's Choice BHA, The Ordinary AHA/BHA
Puberty Safe alternatives:
• **ATTITUDE** — Face Scrub
• **The Ordinary** — PHA 5% Exfoliating Lip Serum

If they use a toner / mist from: Thayers, Mario Badescu, Pixi
Puberty Safe alternatives:
• **Evereden** — Kids Multi-Vitamin Hydrating Face Mist
• **Glow Recipe** — Watermelon Glow PHA+BHA Pore-Tight Toner

If they use a oil / balm from: Drunk Elephant, Burt's Bees, Weleda
Puberty Safe alternatives:
• **ATTITUDE** — Argan Face Oil
• **Beautycounter** — The Brightening Facial Oil
• **Drunk Elephant** — A-Gloei Marula Retinol Oil
• **Drunk Elephant** — Virgin Marula Luxury Face Oil
• **The Ordinary** — 100% Cold-Pressed Virgin Marula Oil
• **The Ordinary** — 100% Organic Cold-Pressed Moroccan Argan Oil

If they use a wipe (face / makeup remover) from: Neutrogena Makeup Remover Wipes, Cetaphil Wipes
Puberty Safe alternatives:
• **Parent's Choice** — Parent's Choice Baby Hand + Face Wipes Fragrance Free
• **Pure Haven** — Makeup Remover

SECTION 12

Label checklist for any face product

Use this for products that are not in this guide, or to check a new formula before you buy it.

01 Preservative stack

Phenoxyethanol, ethylhexylglycerin, chlorphenesin — individually mild, but they repeat across almost every face product. More leave-on steps means more exposure.

02 Fragrance or parfum

"Fragrance" or "Parfum" on the label can hide many separate ingredients. "Unscented" is not automatically fragrance-free.

03 Retinoids and acids

Adapalene, retinol, retinal, tretinoin, salicylic acid, glycolic acid, lactic acid. Powerful ingredients that thin young skin. Use sparingly, not nightly.

04 Chemical UV filters

Oxybenzone, octinoxate, octocrylene, homosalate — flagged as endocrine disruptors in the puberty reference. Prefer zinc oxide or titanium dioxide mineral sunscreens.

05 PEGs and silicones

PEG-8, PEG-100, dimethicone, cyclopentasiloxane. The audit escalates products with PFAS-adjacent silicones.

06 Scent components

Linalool, limonene, citral, geraniol — soft flag, but still cause reactions in some kids with sensitive or acneic skin.

07 Fewer steps, cleaner steps

A tween does not need 7 products. Cleanser + moisturizer + mineral sunscreen is a complete routine.

08 Patch test first

Apply a small amount to one area for a few days before daily use. New products on breakout-prone skin can trigger more breakouts.

09 When in doubt, ask

Talk with a pediatrician or dermatologist, especially for persistent acne, Rx-level retinoids, or sensitive-skin conditions. Prescription treatment is often cleaner than DIY stacking.

Want the full picture for your child?

Face care is one piece of puberty health. The Puberty Scanner is being built to help parents look at personal care products, and the wider puberty picture, in one place. Join the waitlist to be first to hear when it opens.

About this guide

This guide is educational. It describes ingredients that the Puberty Scanner audit flags as associated with specific concerns. It does not diagnose, treat, or prevent any condition, and it is not a recommendation to buy or avoid any specific brand. Ingredient lists change, and the grades apply to the ingredient lists the audit reviewed as of October 16, 2026. Always check the label on the product you actually buy. If your child has a medical condition, a known allergy, or a skin reaction, talk with a qualified healthcare provider before making changes.

Brand names appear only as printed on the products. Grades describe ingredient lists, not the companies that make them. Products marked "Not gradable" have not been assessed and should not be read as either safe or unsafe.
