PUBERTY SCANNER · PARENT GUIDE

Deodorant Ingredients for Kids and Teens

Which deodorants were graded Puberty Safe, what the flagged ingredients are, and how to read any label before you buy. Updated October 2026.

288
body deodorant, antiperspirant and spray products graded

8
underarm deodorant wipes graded

4,276
personal care products in the full audit, across 106 brands

Prepared by Nina-Marie Rueda, ND, NTP, CHC
Ingredient data current as of October 15, 2026

START HERE

How to use this guide

Deodorant is often the first personal care product a child or teen chooses and uses without help. This guide shows how each deodorant was graded against the Puberty Scanner ingredient reference, so you can compare products and understand why they received the grade they did.

1 Find the product

Look up the product your child uses, or the one you are considering, in Sections 5–10.

2 Check its tier

Puberty Safe means no ingredients were flagged in the audit. Every other tier lists the flagged ingredients.

3 Read the real label

Formulas change, and a grade applies to the formula as it was audited. Check the package you actually buy.

4 Try a swap

If your child uses an Avoid-tier product, see the Switch Guide (Section 10) for a Puberty Safe match in the same product form.

What the grades mean

Body products in this guide, by tier (288 total):

Tier	What it means in this audit	Products
Puberty Safe	No ingredients flagged in the audit reference.	37
Use Caution	One flagged ingredient with no escalation. Worth reading the label and deciding whether it suits your child.	3
Avoid (Mild)	Flagged ingredients without escalation.	0
Avoid (Moderate)	A flagged fragrance or metal-based ingredient is present.	31
Avoid (High Priority Swap)	Several flagged ingredients, or an escalation: PFAS, heavy metals, or an ingredient flagged as associated with carcinogenicity in a product meant to stay on the skin.	200
Not gradable	The audit did not have enough ingredient information to assign a tier. This is not a safety rating in either direction.	17

Escalation terms

PFAS: per- and polyfluoroalkyl substances, a group of ingredients associated with persistence in the body and environment.

Heavy metals: metal-based ingredients the audit flags as associated with metal exposure.

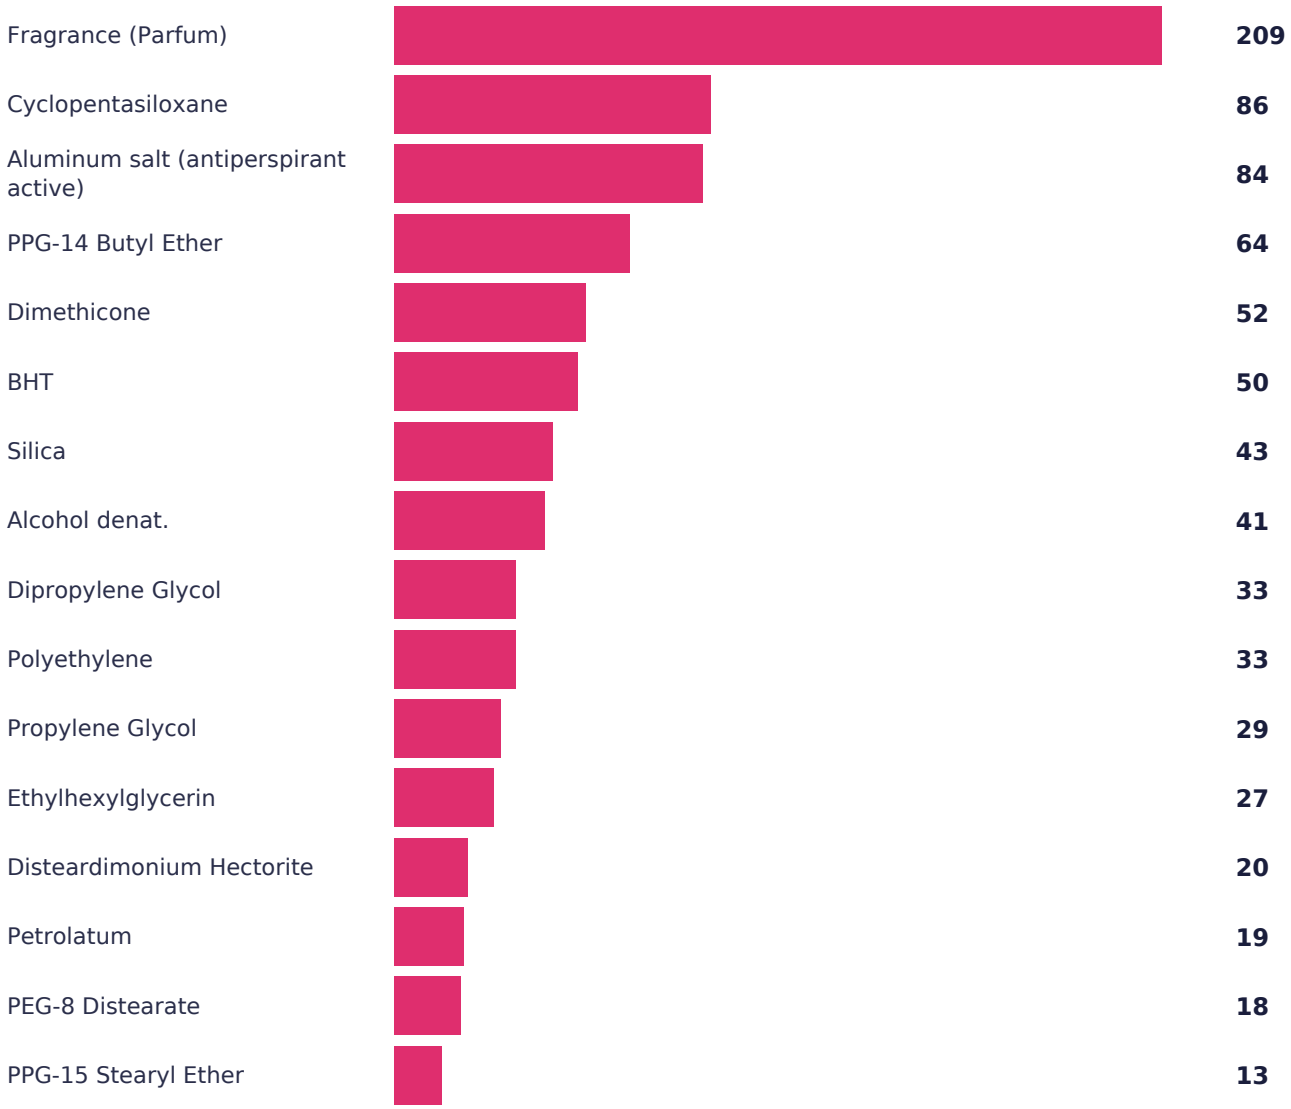

Carcinogen in leave-on: an ingredient the audit flags as associated with cancer risk, in a product meant to stay on the skin.

Flags describe ingredients, not the company that makes the product. A flag is a reason to read the label more closely, not a diagnosis or a proof of harm.

SECTION 3

The ingredients that show up most often

Counts across the 288 body deodorant products. Use this to spot patterns on a label. Counts apply to this audit only.

Full list of flagged ingredients

Ingredient	Group	Products
Fragrance (Parfum)	Fragrance	**209**
Cyclopentasiloxane	Silicones, waxes and emollients	**86**
Aluminum salt (antiperspirant active)	Antiperspirant actives (aluminum salts)	**84**
PPG-14 Butyl Ether	Solvents, carriers and alcohols	**64**
Dimethicone	Silicones, waxes and emollients	**52**

BHT	Thickeners, preservatives and stabilizers	**50**
Silica	Thickeners, preservatives and stabilizers	**43**
Alcohol denat.	Solvents, carriers and alcohols	**41**
Dipropylene Glycol	Solvents, carriers and alcohols	**33**
Polyethylene	Silicones, waxes and emollients	**33**
Propylene Glycol	Solvents, carriers and alcohols	**29**
Ethylhexylglycerin	Thickeners, preservatives and stabilizers	**27**
Disteardimonium Hectorite	Thickeners, preservatives and stabilizers	**20**
Petrolatum	Silicones, waxes and emollients	**19**
PEG-8 Distearate	Thickeners, preservatives and stabilizers	**18**
PPG-15 Stearyl Ether	Solvents, carriers and alcohols	**13**
Isododecane	Silicones, waxes and emollients	**12**
Dimethiconol	Silicones, waxes and emollients	**11**
Talc	Thickeners, preservatives and stabilizers	**11**
Limonene	Naturally occurring fragrance components (soft flag)	**8**
Linalool	Naturally occurring fragrance components (soft flag)	**8**
Paraffinum Liquidum	Silicones, waxes and emollients	**8**
Tetrasodium EDTA	Chelators	**8**
Steareth-100	Thickeners, preservatives and stabilizers	**7**
Peg/ppg-18/18 Dimethicone	Other flagged ingredients	**6**
Phenoxyethanol	Thickeners, preservatives and stabilizers	**5**
PEG-8	Thickeners, preservatives and stabilizers	**5**
Disodium EDTA	Chelators	**5**
Coumarin	Other fragrance components	**5**
Amyl Cinnamal	Other fragrance components	**5**

Escalation counts

Naturally occurring fragrance components

Linalool, limonene, citral and geraniol occur naturally in essential oils. The audit gives them a soft flag rather than a full flag. They are listed separately so you can tell them apart from synthetic fragrance, which is a full flag. If your child reacts to a plant-based scent, these are worth checking on the label.

SECTION 4

Patterns worth knowing

Common patterns observed across the audit that help you read labels more quickly.

Aluminum-free does not mean clean

Of the roughly 20 products in this audit that market themselves as "aluminum-free", many still carry fragrance (parfum), PPG ethers, cyclopentasiloxane, or formaldehyde-releasing preservatives. Removing one flagged ingredient (aluminum salt) does not automatically add every other product to Puberty Safe. Check the full label.

The "whole body deodorant" trend

About 10 products in this audit are marketed as "whole body" deodorants, meant to be applied beyond the underarms (chest, feet, intimate areas). Several of these are sprays carrying propellants and aerosolized actives. A product that goes on more skin, more often, deserves a closer label read, not a looser one.

Teen boy body sprays

The 27 Axe and Old Spice body sprays and antiperspirant sprays graded in this audit all landed in Avoid (High Priority Swap). Aerosolized fragrance plus propellants (butane, isobutane, propane) in a product kids often spray in a bathroom or locker room means inhalation exposure, not just skin contact. If your tween or teen is reaching for one of these, a stick or roll-on alternative is an easy swap.

Scented vs. unscented is not the same as flagged vs. clean

Fragrance (Parfum) is the single most frequently flagged ingredient in the audit, appearing in 209 of 288 products. But "unscented" is not automatically Puberty Safe either — some unscented formulations still carry PPG ethers, dimethicone, or aluminum salts. "Fragrance-free" on the front label is a first filter, not the whole decision.

SECTION 5

Puberty Safe deodorants

Puberty Safe 37 products

No ingredients were flagged in the audit. Read the label each time you buy, since formulas change.

Brand	Product	Form	Flagged ingredients (audit)	Escalation

SECTION 10

Switch guide: if your child uses...

Common Avoid-tier products matched with Puberty Safe alternatives in the same product form (stick, spray, roll-on, cream, wipe). Based on the current audit — formulas change, so always re-check the label.

If they use a stick / solid from: Dove, Lume, Secret, Mitchum, Suave, Native, Hello
Puberty Safe alternatives:
- **Each & Every** — After Glow (Raspberry Mandarin) Deodorant
- **Each & Every** — Alone Time (Cedar Vanilla) Deodorant
- **Each & Every** — Apres (Sea Cucumber Mediterranean Cypress) Deodorant
- **Each & Every** — Day Dream (Citrus Vetiver) Deodorant
- **Each & Every** — Eternal Summer (Coconut Lime) Deodorant

If they use a spray from: Dove, Lume, Native, Axe, Old Spice, Degree, Secret
Puberty Safe alternatives:
- **EO & Everyone** — Eo Essentials Tea Tree Deodorant Spray
- **EO & Everyone** — Jasmine Verbena Deodorant Spray
- **EO & Everyone** — Organic Citrus Deodorant Spray
- **EO & Everyone** — Organic Lavender Deodorant Spray
- **EO & Everyone** — Rose Lemon Deodorant Spray

If they use a roll-on from: Suave, Mitchum, Weleda, Secret
Puberty Safe alternatives:
- **Sprouts Brand (Real Root)** — Real Root by Sprouts Mineral Salt Roll on Deodorant, unscented
- **Each & Every** — After Glow (Raspberry Mandarin) Deodorant
- **Each & Every** — Alone Time (Cedar Vanilla) Deodorant
- **Each & Every** — Apres (Sea Cucumber Mediterranean Cypress) Deodorant

If they use a wipe from: Lume (wipes), Megababe (shower sheets)
Puberty Safe alternatives:
- **Pacifica Beauty** — Coconut Milk & Essential Oils Underarm Deodorant Wipes
- **EO & Everyone** — French Lavender Organic Deodorant Wipes

SECTION 11

Not gradable

Not gradable 17 products

The audit did not have a complete enough ingredient list to grade these. This is not a safety rating in either direction. Read the full label against the flags in Section 3.

Brand	Product	Form	Flagged ingredients (audit)	Escalation
Dove	Dove 0% Aluminum Deodorant Stick Cotton Flower & Sandalwood	Stick	*None flagged*	—

Lume	Soft Powder Deodorant Wipes 45 Count	Use Caution	Alcohol
Pacifica Beauty	Coconut Milk & Essential Oils Underarm Deodorant Wipes	Puberty Safe	*None flagged*

SECTION 13

Label checklist for any deodorant

Use this for products that are not in this guide, or to check a new formula before you buy it.

01 Fragrance or parfum

Look for "Fragrance" or "Parfum." This catch-all can hide many separate ingredients.

02 Aluminum salts

If you want an aluminum-free product, check for aluminum chlorohydrate or aluminum zirconium. Those are antiperspirant actives.

03 PFAS and metals

Look for PFAS terms and metal-based ingredients. The audit escalates products that contain them.

04 Solvents and carriers

Check propylene glycol, dipropylene glycol, PPG ethers, and alcohol denat.

05 Scent components

Linalool, limonene, citral and geraniol are a soft flag, but they can still cause reactions in some children.

06 Product form

Sticks, creams, roll-ons, and sprays can carry different ingredients. A grade for one form does not carry over to another.

07 Aerosol / spray caution

Aerosolized formulas get inhaled, not just applied. Propellants (butane, isobutane) count on the label too.

08 Patch test first

Apply a small amount to one area of skin for a few days before regular use.

09 When in doubt, ask

Talk with a pediatrician, dermatologist, or your child's healthcare provider, especially if your child has eczema, sensitive skin, allergies, or a skin condition.

Want the full picture for your child?

Deodorant is one piece of puberty health. The Puberty Scanner is being built to help parents look at personal care products, and the wider puberty picture, in one place. Join the waitlist to be first to hear when it opens.

About this guide

This guide is educational. It describes ingredients that the Puberty Scanner audit flags as associated with specific concerns. It does not diagnose, treat, or prevent any condition, and it is not a recommendation to buy or avoid any specific brand. Ingredient lists change, and the grades apply to the ingredient lists the audit reviewed as of October 15, 2026. Always check the label on the product you actually buy. If your child has a medical condition, a known allergy, or a skin reaction, talk with a qualified healthcare provider before making changes.

Brand names appear only as printed on the products. Grades describe ingredient lists, not the companies that make them. Products marked "Not gradable" have not been assessed and should not be read as either safe or unsafe.
